OUR SERVICES

Rockerz is a self-performing national provider offering a full suite of concrete flooring services. Our on-site team will help determine the services best suited for your needs.

Concrete Grind and Polish

The most cost effective and highly aesthetic flooring system. The floors are both beautiful and durable.

Epoxy Coatings and sealers

The best choice for floors that experience very heavy traffic, movement of heavy equipment, or environments prone to penetrating stains.

Stained Polished Concrete

Concrete colorization will transform your floor into any color, custom design, illustration, or pattern you can imagine. The dyes become a part of the concrete. These floors will not show wear patterns because our dyes impregnate the concrete at a molecular level.

Overlayment

This self-leveling system provides the highest level of surface precision and strength for any creative floor treatment - making it virtually indestructible!

Concrete Restoration

Our experience will provide the best flooring solution for your business with a smooth, clear and safe walking surface. Perfect for an open store remodel, or existing worn or damaged floors.

WHY CHOOSE ROCKERZ?

SELF-PERFORM
